Cannibble Food-Tech Ltd. Announces Establishment of Robotics and AI Division and Partnership to Explore Service Robotics Deployment

ROSH HAAYIN, Israel, Jan. 23, 2026 (GLOBE NEWSWIRE) -- Cannibble Food-Tech Ltd. (CSE: PLCN) ("Cannibble" or the "Company") today announced the establishment of a Robotics and Artificial Intelligence Division for the Food and Hospitality Industry and the execution of a partnership agreement with AIBotics Inc. (OTC: AIBT) ("AIBotics"), a developer of AI-enhanced service robots and automation software.

The newly established division is intended to support Cannibble's evaluation and potential commercialization of AI-enabled robotic technologies for use in food service, hospitality, and security applications. The initiative represents an expansion of the Company's strategic review of automation technologies that may complement operational needs within service-oriented environments.

Under the partnership, Cannibble and AIBotics have agreed to collaborate in exploring the deployment of AI-powered service robots across food service, hospitality, and security markets, initially in Israel and, subject to market conditions and the establishment of definitive agreements, in North America, Latin America, and the Middle East. The parties intend, subject to the execution of definitive distribution agreements, to act as reciprocal exclusive distributors for each other's robotic products and services within defined territories. Cannibble has existing industry relationships and commercial contacts within Israel that may support these efforts.

Pursuant to the partnership, Cannibble's Robotics and AI Division is expected to support the distribution in Israel of certain service robots manufactured by KEENON Robotics, in accordance with AIBotics' agreement with KEENON Robotics. The service robots contemplated under the arrangement include the following service robots designed for applications such as food delivery, hospitality support, and cleaning services:

- DinerBot series (T8, T9, T10, T11)

- [ButlerBot W3](#)

- [KleenBot C30 and C40](#)

The Company expects its Robotics and AI Division to focus initially on market assessment, customer engagement, and pilot opportunities. There can be no assurance that the establishment of this new division or the partnership with AIBotics will result in commercial deployments, revenues, or long-term arrangements.

The partnership agreement with AIBotics provides for an initial term of three years with automatic renewals, subject to its terms and conditions.

About Cannibble Food-Tech Ltd.

Cannibble is an innovative food-tech company that develops food and beverage products variously enhanced with alternative proteins. Cannibble has developed proprietary formulas for food and beverage products enhanced with alternative proteins targeted for the "Better-for-You" segment.

Cautionary Statement Regarding Forward-Looking Information

This news release contains "forward-looking information" or "forward-looking statements" within the meaning of Canadian securities legislation. All statements included herein are forward-looking, other than statements of historical fact. Generally, the forward-looking information and forward-looking statements can be identified by the use of forward-looking terminology such as "plans", "is expected", or "will continue", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved. Forward-looking statements in this press release include, but are not limited to, statements relating to: the potential future operations of the Cannibble; the anticipated benefits of Cannibble's new operational division and its partnership with AIBotics; the potential to enter into definitive distribution agreements; and the potential geographic markets that Cannibble anticipates expanding operations into.

These forward-looking statements are based on management's assumptions as at the date hereof, which assumptions include: that Cannibble will have the necessary resources to develop and expand its new operational division and participate in the partnership agreement with AIBotics as anticipated; that the demand for service robots will be consistent with management's expectations; and that Cannibble will be able to secure definitive distribution relationships.

Forward-looking information and forward-looking statements, while based on management's best estimates and assumptions, are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, performance, or achievements of Cannibble to be materially different from those expressed or implied by such forward-looking information or forward-looking statements. The forward-looking statements in this press release are subject to the following risks: that Cannibble will not have the necessary resources to participate in the partnership agreement with AIBotics

or continue to expand its operations as currently anticipated, or at all; that the industry and market demand for service robots will not develop as currently anticipated; that Cannibble will not be able to secure definitive distribution agreements on the terms it currently hopes to negotiate, or at all; and other risk factors as described in Cannibble's public disclosure documents filed on its SEDAR+ profile page at www.sedarplus.ca.

Although Cannibble has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information and forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such information or statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information or statements. The forward-looking statements and forward-looking information are made as of the date hereof and Cannibble disclaims, except as required by applicable securities laws, any obligation to update any such factors or to publicly announce the result of any revisions to any of the forward-looking statements or forward-looking information contained herein to reflect future results. Accordingly, readers should not place undue reliance on forward-looking statements and information.
